

Toffeln[®]

**FOOTWEAR & SURGICAL
PRODUCTS CATALOGUE 2023/2024**

HEALTHCARE INNOVATION FOR YOUR WELLBEING

For your convenience, we have put all Toffeln products into one catalogue for you.

We are known and loved for our footwear, and we are currently the number one comfort brand with an extensive footwear range designed specifically for healthcare professionals. Our footwear products are presently being worn by around 90% of UK operating theatre staff and by thousands of healthcare professionals in over 18 countries worldwide.

Did you know that Toffeln also offers an extensive range of surgical products designed for your well-being and, like our footwear, are all guaranteed certified? Better still, many products are available through NHS supply chain contracts and are also used by most Private Healthcare providers. We back all Toffeln products with stock in our Bristol warehouse for fast delivery, and after 45 years, we know and understand the pressures on healthcare, and we are always here to support you.

Charlie Leflaive
Director

Our price promise

We want everyone to be able to wear Toffeln shoes, so we work hard to deliver at the most reasonable price possible. If you find equivalent footwear at a lower price, we will better that price (reasonable proof required).

Our guarantee

True to our mission, we guarantee the quality of every pair of shoes that we dispatch. If they fail to reach the high quality you would expect, we will replace them free of charge. And for further assurance, we are an ISO 9001 quality registered company.

3 Steps to easy ordering

- 1 Choose your product
- 2 Use the product code, followed by the size required
- 3 Email your order through to sales@toffeln.com

Alternatively, we are **PEPPOL ready** for fully integrated ordering, so please get in touch with us to arrange integration.

TOFFELN POINTS OF DIFFERENCE

Personal service from people who care

At Toffeln, we take pride in providing the latest healthcare products and a personal service that stands out from the crowd from a team who genuinely cares about healthcare and your well-being.

Our highly trained customer care professionals are on-hand to go the extra mile and assist you with any questions you may have about our diverse range of footwear and surgical products.

We also understand the importance of offering hands-on experience with our products, which is why our dedicated Key Account Managers can provide a product demonstration, a free trial or a product sample.

Reliable & Trustworthy

We understand that experience matters, and as a friendly family-run business with over 45 years in the industry, we have gained extensive knowledge that our customers have come to trust and rely on.

Our expertise enables us to design footwear and surgical products that are explicitly tailored to meet the healthcare industry's unique demands. We are proud to say that all products within this catalogue exceed the quality control standards you'd expect and deserve.

Additionally, our long-standing relationship with the NHS means that most of our products are already available on NHS Supply Chain for your convenience and peace of mind.

Look out for the logo and see how many products are already available on NHS Supply Chain.

Meet our friendly Customer Care Team

Prioritising Efficiency & Sustainability

At Toffeln, we understand the importance of offering a reliable delivery service that is efficient and sustainable. We take great pride in our extensive stock holding facility in Bristol, UK, which is manned by our experienced and capable team of Warehouse Operatives. This facility enables us to deliver the right products to the right places on a next day service.

Our distribution partner has an impressive on-time delivery rate of 98% and shares our carbon reduction goals by committing to a 100% electric vehicle fleet by 2030. Our surgical gowns and drapes manufacturing facility also produces 35% of their electricity from solar energy. Better still, their proximity to the UK dramatically reduces our carbon footprint and lead times, allowing us to respond promptly to any increase in demand.

“Our extensive stock holding facility and our experienced team, enables us to deliver the right products to the right places on a next day service.”

Corrie Leflaive
Operations Director

TOFFELN GIVING BACK

At Toffeln we believe in giving back. We support a wide range of Charities engaged in humanitarian work. In fact, we have made large donations to charitable causes. In addition, our New Lease of Light programme donates reconditioned headlights to worthy causes around the world along with footwear and medical equipment.

Toffeln is dedicated to supporting charities including:

TOFFELN SUPPORTING THE ROYAL COLLEGE OF SURGEONS OF EDINBURGH

We are pleased to be supporting the Royal College of Surgeons of Edinburgh to launch a new fellowship that will support trainee surgeons to gain international experience, share knowledge and best practice in surgical care. By sharing expertise and bringing back new skills, the fellows will contribute to the continuous improvement of surgical care in the NHS and UK Healthcare, ultimately leading to better patient outcomes.

THE ROYAL
COLLEGE OF
SURGEONS
OF EDINBURGH

“As a company committed to improving healthcare, we believe that supporting our trainee surgeons will make a real difference. We are thrilled about the possibilities that our sponsorship will bring to the surgical community and are excited to welcome the first RCSEd Toffeln Travelling Fellows, who will undoubtedly make a significant contribution to the NHS and UK Healthcare”

Ben Turner
Managing Director

SUSTAINABLE COMMITMENTS

At Toffeln, we are passionate about reducing our carbon footprint and working towards a more sustainable future for us, our customers, and the planet. As a responsible company, we care about the future and believe we must support the NHS Net Zero Plus program and reduce our influenceable emissions to help combat climate change.

Step to the Future

As a company, we are committed to becoming **carbon neutral by 2026**, ahead of both the NHS 2045 Net Zero date and the 2036-2039 80% reduction target date. To achieve this goal, we have established a carbon savings committee with members from every department within Toffeln. We aim to achieve a 20% reduction in carbon emissions each year until we hit carbon-neutral status in 2026.

Key Initiatives

We are excited to share some of our key sustainability initiatives, that will help us on our journey to becoming carbon neutral:

- 1 Developing new space-saving packaging solutions from recycled FSC rated material.
- 2 Transitioning towards producing products from sustainable sources.
- 3 Reducing single-use plastic consumption across all our product ranges.
- 4 Switching to LED lighting to reduce carbon emissions by 55%.
- 5 Introducing PIR (Passive Infra-Red) detection sensors to reduce energy consumption from lighting when areas are not in use.
- 6 Using electric vehicles to deliver our products where possible.
- 7 Installing electric vehicle charging points at our work premises to encourage our staff to invest in sustainable methods of transport.
- 8 By selecting sustainable manufacturing facilities who demonstrate green credentials and who are in closer proximity to the UK.

We believe that these initiatives will help us reduce our carbon footprint and make a positive contribution to a more sustainable future for us, the planet and its future.

We have implemented sustainable practices, including the installation of electric vehicle charging points for staff, the use of electric vehicles for UK distribution, and by selecting sustainable manufacturing facilities – Our Surgical Gowns & Drapes Manufacturer generates 35% of their electricity from solar panels, and they are looking to increase this number to 50% in 2024.

We are developing new ways to manufacture our products sustainably and already offer hospital clothing made from **75% recycled material** (see pages 80–81) and have recently developed a **Carbon Neutral Clog** (see page 19–20). We want to extend this range in 2024 by creating a carbon-neutral surgical gown.

Introducing Toffeln Green T

We understand that the journey towards offering sustainable products is a long one. This is why in 2022, we took our first steps on this journey and developed a sub-brand of Toffeln that embodies our sustainable values by offering a collection of products that have a reduced carbon footprint and are manufactured with Renewable and/or Recycled sources. We called this sub-brand the Green T Collection.

“Through the changes implemented so far, we have successfully reduced our Electricity Carbon Footprint by 40%, which shows encouraging progress”

Jim Leflaive Systems Manager

FOOTWEAR

At Toffeln we've dedicated our lives to enhancing foot wellbeing, helping healthcare professionals to have healthier, supremely well supported feet.

We know how harshly poorly designed, ill-fitting and inappropriate footwear can impact tender toes and hard-pressed arches. That's why we work with the leading biomechanics researchers to design and develop the most advanced range of fully compliant footwear.

We combine the functional and the fashionable to create ergonomically designed, super lightweight, beautifully fitting footwear, to provide ultimate comfort for hour after hour of standing, lifting and walking.

And driven by our mission to make every minute of those long working shifts seem shorter, at Toffeln we're passionate about...

Loving your feet

Meet Toffeln's Footwear Designer

At Toffeln, we are passionate about delivering an exceptional customer experience. And, even though comfort and support are our top priority, we also understand that design plays a pivotal role in shaping this experience.

That's why, in 2015, we started collaborating with the renowned footwear designer Anthony Stoker. Since then, we have nurtured a great partnership with Anthony, and together, we have embarked on some awe-inspiring projects that have led to the evolution of some of our best selling collections - from our famous SmartSole Range to this year's latest addition, the Green T EziKlog.

In this section, we offer a glimpse into the creative mind of Anthony as he shares sources of inspiration and gives you an insight into the design process, from his initial sketches to the final product.

“When I first began working with Toffeln a few years ago, I was amazed by the fantastic position they were in, in being able to serve such a unique and caring audience. It’s been an honour to design shoes that offer the comfort and support you require to carry out your role so that you can provide your patients with the comfort and support they need.”

Anthony Stoker
Footwear Designer

Developing SmartSole

At Toffeln, we understand the unique position that our healthcare professionals are in and that their specific needs for workplace footwear would not be met with just one solution. With this in mind, we embarked on the remarkable journey of SmartSole, with a vision to develop a range of footwear that prioritised proper standing posture and incorporated interchangeable insoles that catered to the specific contours of each individual's footbed.

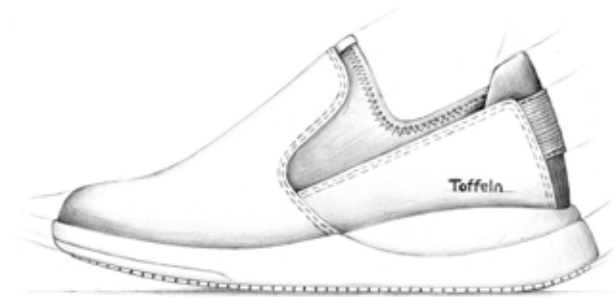

The result? A revolutionary solution that dramatically reduces the risk of musculoskeletal problems in healthcare workers by delivering unparalleled comfort and customisable support tailored to the individuals' preferences.

Anthony's Inspiration

The seeds of the **SmartSole** range began with wanting to develop a style - a language of sorts - that people working within healthcare would come to recognise as something designed specifically for them - as something of their own. A range that they would feel confident in, supported by, proud to wear and to recognise them on their colleagues' feet and feel an affinity and a sense of trust. A visual language that would be recognised as comfortable and supportive. Not just physically but psychologically too. It's about building that trust and honouring it.

I've delivered comfort levels for other brands that have seen significant success. Together with the Footwear Development Team at Toffeln, we've provided a footwear range that we can be proud to see across the healthcare industry.

Developing Green T EziKlog

Our dedication to sustainability led us to create footwear that prioritises comfort and functionality for the end-users and respects the environment during the manufacturing process. As a starting point for this project, we took our best selling **EziKlog** design and looked into ways to reduce our carbon emissions during manufacturing.

After two years of diligent research and development, we proudly present our latest addition to the Toffeln footwear range and the **World's First Carbon Neutral Clog**. We have achieved a remarkable milestone in our commitment to a greener future by utilising sustainable materials from renewable sources – in the case of **Green T EziKlog**, we replaced part of the traditional EVA content with Sugar Cane Waste and used recycled rubber to create a slip-resistant sole. With this innovation, healthcare professionals can now step forward with confidence, knowing that their choice of footwear aligns with their eco-conscious values.

Anthony's Inspiration

Sometimes it's about evolving what we have, to be better, rather than starting anew. And when it came to developing a new sustainable **EziKlog**, 'better' started with looking at nature's sustainable substitutes to traditional EVA.

We found that by incorporating sugar cane, we could reduced our usual EVA compound usage by half. Pairing this with a recycled rubber sole then elevated our **EziKlog** offering to new levels by attaining a carbon-neutral status.

Better still, the reference to sugar cane also provides a tasty inspiration for some **fruity-coloured clogs!**

The Science of Comfort & Wellbeing

The Difference with Toffeln

There are many brands of footwear promoting comfort. The difference with Toffeln footwear is that it is designed specially for the healthcare industry, for doctors and nurses... people like you.

Better by Design

All shoes are not equal - sports footwear is designed for intensive, limited duration activities, the popular high street brands are not designed for healthcare environments or the length of shift for which they are worn; hard working feet need supportive footwear, so soft is not always the best solution. That is why Toffeln footwear has gone through extensive testing in healthcare environments in order to create a unique product that really provides the support and all day comfort that healthcare professionals deserve. They are also marked with recognised standards and approvals as proof that they are fit for purpose which you will not find on most other brands.

Toffeln Biomechanics Working for You

We have over 40 years of expertise in healthcare footwear. Toffeln work closely with industry experts and scientists in foot health and have commissioned the first in depth studies on the impact of operating theatre work on feet and the musculoskeletal system.

Working alongside experts at the University of Salford we have carried out biomechanical studies to understand the effects of long hours of standing and walking in Operating Theatres, Hospitals, and related Healthcare environments.

Toffeln Footwear Manufactured with Love

Every pair of Toffeln shoes is manufactured with painstaking care to ensure they give you lasting comfort and reliability.

To ensure you enjoy the best service we carry stock of more than 70,000 pairs for fast despatch to you.

Easy Tips for Footcare

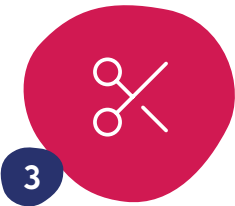

Get into the habit of carrying out this simple footcare routine for 21 days and feel the difference...

As part of your daily routine wash your feet in mild soapy water to gently remove impurities

Moisturise with a good urea-based moisturiser - this improves hydration and prevents dry, cracked skin

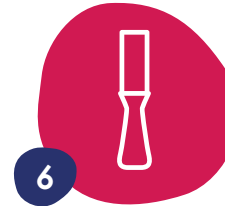

Cut toenails regularly. Always cut straight across and never at an angle or down the edges, which can cause ingrown toenails

Wear good socks with a high natural fibre content, or technical smart fibres and change daily. Compression socks can help to reduce fluid in legs and feet and reduce fatigue

Dry thoroughly, paying particular attention to drying between the toes. This will help to prevent fungal infections

Remove hard skin. Avoid the build-up of thick and painful hard skin by using a foot file or pumice stone to gently get rid of any dead skin cells, especially on the heels

Select well-fitting footwear designed specifically for healthcare use. These usually have a cushioned sole, closed front, are quiet to wear and will be marked SRC for exceptional slip resistance

Check feet daily for any blisters, cuts, spots, or swellings and don't just 'put up' with foot pain. Report any serious concerns to a Podiatrist or Doctor

Are you looking after your “highly valued teams” feet?

To ensure good levels of staff wellbeing and to improve infection control footwear should be regularly replaced. New footwear provides maximum levels of support for hard working feet and is more hygienic.

“We suggest replacing footwear
twice a year, it’s a small price to
pay for comfort and safety.”

Matt Oxbrough
Product Development & Quality Assurance

Plantar Fasciitis

If you've ever experienced a persistent stabbing pain on your heel – especially when you get out of bed in the morning – then you know all about plantar fasciitis.

This common orthopaedic complaint can cause nagging discomfort that makes walking almost unbearable. While many runners battle this condition while exercising, for many that are on their feet all day at work, this can turn your job into a nightmare.

What causes plantar fasciitis?

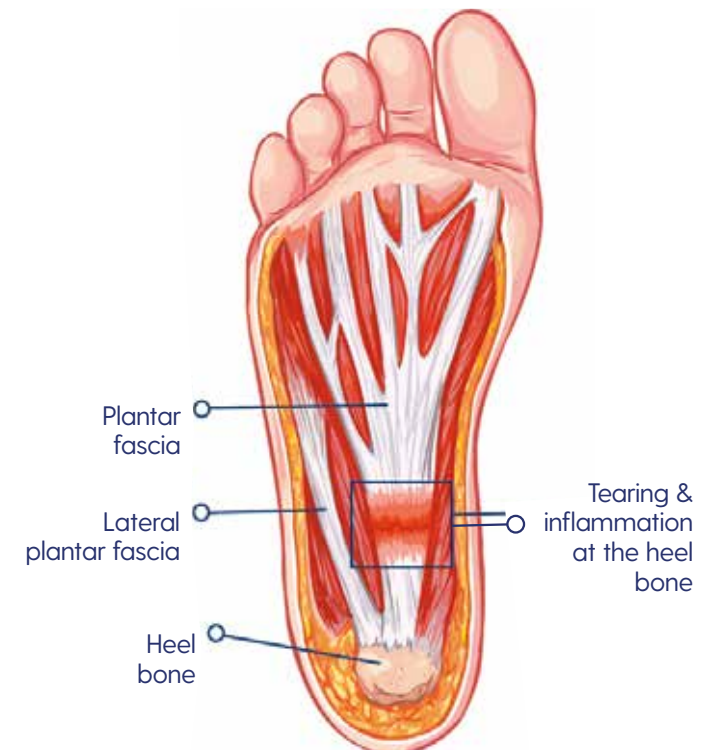

Plantar fasciitis is caused by straining the part of your foot that connects your heel bone to your toes (plantar fascia). It is not always clear why this happens. You may be more likely to get plantar fasciitis if: you are 40 to 60 years of age, do a lot of walking running or standing, wear shoes with poor cushioning or support or are overweight.

Possible Solutions to the list of ways of easing PF:

- Wearing wide, comfortable shoes with a low and soft heel
- Using insoles in your shoes
- Comfortable arch support
- Resting your foot raised when you can
- Avoid putting pressure on your feet if you're able to (e.g. try swimming rather than running)

“I suffer from plantar fasciitis on my 9 hour+ shifts. With Toffeln SmartSoles, I have comfort throughout my shift and am pain free when I get home.”

Catherine Nurse

What is plantar fasciitis?

Plantar fasciitis is a common cause of heel pain, which involves inflammation to the thick band of tissue which runs across the bottom of your foot. This band of tissue is used to connect your heel bone to your toes, is also known as the plantar fascia. Plantar fasciitis can often cause a sharp pain that normally occurs as soon as you wake up.

The pain commonly decreases through the day, but can return after walking, standing or running for a long period of time. Despite its insidious nature, it's one of the most prevalent orthopaedic ailments, with an estimated 1 in 10 people suffering from it in their lifetime.

What are the best shoes for plantar fasciitis?

The **Toffeln SmartSole Range** receives praise from sufferers of this condition with its cupped insole, contoured footbed and customisable arch support that stops your feet from flattening out and limits pronation. It offers extra support around the mid-foot to prevent impact on the heel and evenly distributes your weight across the whole foot to help ease the pain for those with plantar fasciitis.

Toffeln SmartSole Clog

See page 29 for more details

Toffeln SmartSole Trainer

See page 33 for more details

Do you have staff who suffer from plantar fasciitis, foot pain, or tired and aching feet?

We suggest you try the SmartSole range or one of the Toffeln insoles. Thousands of happy healthcare workers have proved this for themselves.

If you suffer from any other types of foot conditions, please contact us and we'll be glad to advise.

“I have sensitive feet and started having pain due to plantar fasciitis...very difficult to find comfortable shoes. I bought other clogs from other brands and had to send them back, but these are lovely! I bought 3 pairs, different colours, as I work in different places, and have no regrets. Best thing I ever did, don't feel pain any more as they have elevated heels. And the fact that you can choose the insole you want to use is a plus.”

Features

1 **Guaranteed Certified**

Toffeln Breeze are certified to EN20347:2012, OB, E, SRC. This is the reason that it makes sense to wear Toffeln rather than conventional high street brands or sports shoes as they are tested and approved safe and comfortable for use at work.

2 **GripSafe Extreme SRC rated sole**

Slips and falls cost the average Health Trust £90,000 per year. The GripSafe Extreme sole is independently tested and approved to the high standards of SRC slip resistance.

3 **StretchMesh Breathable Uppers**

The comfy stretch uppers mould comfortably to the feet, allowing room for natural swelling that takes place during the day and accommodating painful or swollen joints. The uppers are highly breathable, keeping feet cool and comfortable, the mesh is tested to EN ISO 20244:2011.

4 **Washable**

SmartSole can be washed to 40°C (allow to dry in a well-ventilated area do not dry with direct heat). Remove insole prior to washing.

5 **Lightweight**

Have you ever considered how many miles a day you walk? The average healthcare worker takes over 10,000 steps a day. Wearing lighter footwear in a healthcare setting can reduce fatigue substantially.

6 **Raised Heel**

As a result of our research the raised heel is at the perfect pitch to distribute pressure more evenly within the shoe for improved comfort and less fatigue.

TOFFELN[®] SmartSole Trainer

Peak performers

At last a trainer that provides you with unparalleled comfort and complies with all the needed CE certification, has a wipe-clean upper and slip-resistant soles. Every pair comes with a choice of 3 free insoles.

GripSafe Extreme SRC rated sole, for high slip resistance to reduce slip accidents at work.

All **SmartSole** footwear includes **THREE** pairs of insoles for your perfect fit.
Also available to buy separately in UK sizes 3-12:
0301 **Soft** \ 0302 **Medium**
0303 **Firm**

Features

1 Guaranteed Certified

Toffeln Breeze are certified to EN20347:2012, OB, E, SRC. This is the reason that it makes sense to wear Toffeln rather than conventional high street brands or sports shoes as they are tested and approved safe and comfortable for use at work.

2 GripSafe Extreme SRC rated sole

Slips and falls cost the average Health Trust £90,000 per year. The GripSafe Extreme sole is independently tested and approved to the high standards of SRC slip resistance.

3 Washable

SmartSole can be washed to 40°C (allow to dry in a well-ventilated area do not dry with direct heat). Remove insole prior to washing.

4 Lightweight

Have you ever considered how many miles a day you walk? The average healthcare worker takes over 10,000 steps a day. Wearing lighter footwear in a healthcare setting can reduce fatigue substantially.

5 Breathable Uppers

The uppers are liquid repellent but highly breathable, keeping feet cool and comfortable.

6 Raised Heel

As a result of our research the raised heel is at the perfect pitch to distribute pressure more evenly within the shoe for improved comfort and less fatigue.

7 Anti-Static Sole

Specifically incorporated to meet static sensitive situations.

Toffeln & V12 Safety Footwear

1

Did you know the average cost of slip accidents to Healthcare Trusts is £90,000. Provision of approved slip resistant footwear massively reduces this risk and associated costs.

2

An estimated one third of reported accidents result from moving and handling. The procedure guidance states: "Before undertaking any manual handling procedure, it is important to be wearing non-slip regulation footwear".

3

All V12 Safety Footwear is approved to EN 20345 and carries a slip rating.

4

All products on pages 51-58 have a safety toe cap protection to EN ISO 20345.

Intelligent Grip System

Three years in the making, V12 have developed the SRC approved Intelligent Grip System (IGS) to provide grip when it really counts in the Healthcare Industry. Following a rigorous testing process, the HSL awarded the IGS a highly prestigious 4-star.

Stability Traction System

Inspired by tractor tyre technology the SRC compliant V12 STS is a revolution in sole design. Made from highly durable PU, the STS provides superb stability and traction on loose surfaces. With firefighter standard ladder grips, a re-designed heel strike pad and non-clogging channels for exceptional water dispersal, the STS sets a new benchmark in rugged sole technology.

EziProtekta[™] Toffeln[™]

Protecting the protectors

With a strong and light-as-air safety toe cap, **EziProtekta** keeps your pinkies protected if you drop something on your foot. They're also super-light and have a Grip-Safe[®] slip-resistant sole to help prevent falls.

Features

- 1 Closed-In Heel**
Specially designed to hold the heel securely.
- 2 EziProtekta Insole**
A complimentary insole is provided with every EziProtekta but its use is optional.
- 3 Adjustable Heel Strap**
Heel strap can be worn in forward or back positions.
- 4 Composite Toe Cap To EN20345:2011 SB SRC**
Tested to 200 joule impact and approved to EN20345:2011 SB SRC, this toe cap offers protection against a high level of impact and compression.
- 5 Grip-Safe[®] Sole**
This unique sole not only gives excellent slip resistance, but also offers a much greater penetration resistance than other lightweight footwear available.

SafetyLite[™] Toffeln[®]

You'd hardly know these are safety shoes; they're light, supremely comfortable and sport high tech, ultra-healthy action-breathe uppers. The wide safety toe cap means no pinching, and the slip-resistant soles could save your day.

Features

1 High Grade Materials

Have been carefully selected to give you an enhanced level of comfort.

2 Slip-Resistant Soles

You'll appreciate the extra protection that the slip-resistant soles give you on slippery surfaces.

3 Ergonomically Designed

Foot shape provides room for your feet to spread naturally, and a wider safety toe-cap prevents toes from being pinched.

Toffeln[®] SterileClean

Following the many requests for a simple footwear disinfecting system, we decided to research what infection control professionals advised. This research led us to produce our SterileClean™ system.

This system is simple and safe to use on all Toffeln products coming out of contaminated areas. The whole process is generally completed in less than one minute.

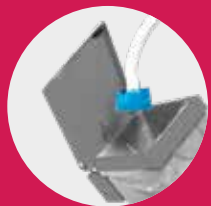

- 1 Connect cleaning pad onto handle.

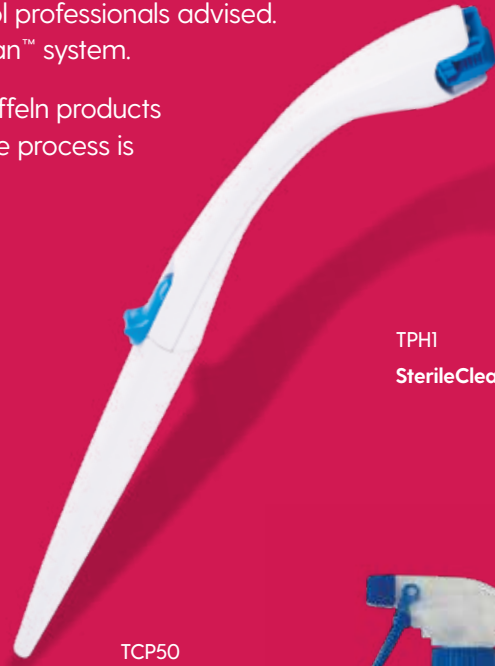

- 2 Spray solution onto cleaning pad.

- 3 Wipe over footwear.

- 4 Discard cleaning pad.

AktivCool[®] Bamboo Compression Socks

Soft and breathable bamboo knee-high graduated compression socks for nurses that reduces swelling and fatigue in the legs.

The **AktivCool** nurses' compression socks are made from bamboo which is known for its absorbency and amazing softness which is often compared to silk. The bamboo material is more breathable than cotton and has channels that absorb moisture, and wick it away from the skin, keeping your feet cool and dry. It is also naturally antibacterial and is completely skin friendly and free from any harmful substances according to the International Oeko-Tex 100 Standard.

Bamboo is a fast-growing renewable resource that is 100% biodegradable.

SURGICAL PRODUCTS

Tried and trusted, Toffeln has been supplying hospitals for over 40 years.

Working alongside surgeons, clinicians, theatre managers and procurement professionals, we provide innovative and cost-effective solutions that enhance surgical capability and improve patient outcomes.

Delivered from our UK stock and guaranteed certified, we supply a well-loved range of theatre equipment and consumables.

“We are excited to share that our surgical product line has experienced substantial growth this year. With numerous new additions available through the NHS Supply Chain, you can be confident that each product surpasses the healthcare industry’s quality standards”

UltraView Headlights

The world's brightest headlight. The Toffeln surgical headlight is a match for any challenge – and any challenger.

It has an output of up to 275,000 lux and a beam size of 100mm up to 200mm. Even better, The HotSwap technology means its rechargeable batteries can be swapped while in use, so there's no downtime.

Because it has no leads, this surgical headlight helps to eliminate surgeons neck pain caused by the weight of the leads in a conventional headlight and eliminates the safety issues caused by trailing cables.

“At Toffeln, our team is dedicated to offering expert advice on tailoring the ideal headlight setup for your unique surgical specialisation. We also take pride in offering an exceptional aftercare service that sets us apart from the rest.”

Taylor Whiteside
Headlight Technician

UltraView Extreme

The UltraView Xtreme cable-free super-bright headlight is a real help to surgeons. Weighing only 312g and with a comfortable padded headband, its beam can be adjusted easily from wide-reaching, down to a very precise 90 millimetres.

Features

1 Li-Po Cell Battery

Two rechargeable batteries are embedded within the headband. Don't worry about which battery is charged - the batteries talk to each other. With our HotSwap technology, a battery can be changed from either side without losing light. Batteries last up to 8 hours.

2 Adjustable Headstrap

Fully adjustable by twisting

3 Adjustable Headband

Fully adjustable by twisting

4 Padded Headband

Ergonomically designed for comfort throughout extended periods of use.

5 Adjustable Light Positioning

Easy to direct light beam.

 Focusable LED Light

Zoom focus high power LED light.

Bezel Options

We offer three different types of bezel options giving you the flexibility to select the headlight that suites you.

Introducing The ObCare Postpartum Balloon

New

We are proud to introduce the ObCare Postpartum Balloon, the latest addition to our surgical range and exclusively available through Toffeln in the UK. As a trusted supplier to the medical sector, we understand the importance of providing healthcare professionals with safe, effective, and reliable medical solutions.

The ObCare Postpartum Balloon System is an innovative solution for the management of postpartum haemorrhage. Backed by medical research and meeting the BS EN ISO 20696:2018 requirements for single-use sterile urethral catheters, the ObCare Postpartum Balloon systems ensures you a safe and reliable solution.

If you have any questions or would like to request a demonstration or free trial, please don't hesitate to contact our dedicated customer care team or your Key Account Manager, who will be happy to assist.

ObCare^{Toffeln} Postpartum Balloon

The disposable sterile system comes complete with two syringes, a bag spike with check valve, and a dual lumen catheter. For the treatment of postpartum haemorrhage, the deflated balloon can be positioned in the uterine cavity either trans-vaginally or via the caesarean section incision. Once the correct position has been confirmed, the balloon can be promptly inflated with saline solution to provide the necessary pressure to the uterine wall. The dual lumen catheter allows for easy monitoring of the haemorrhage during the procedure until the bleed has stopped.

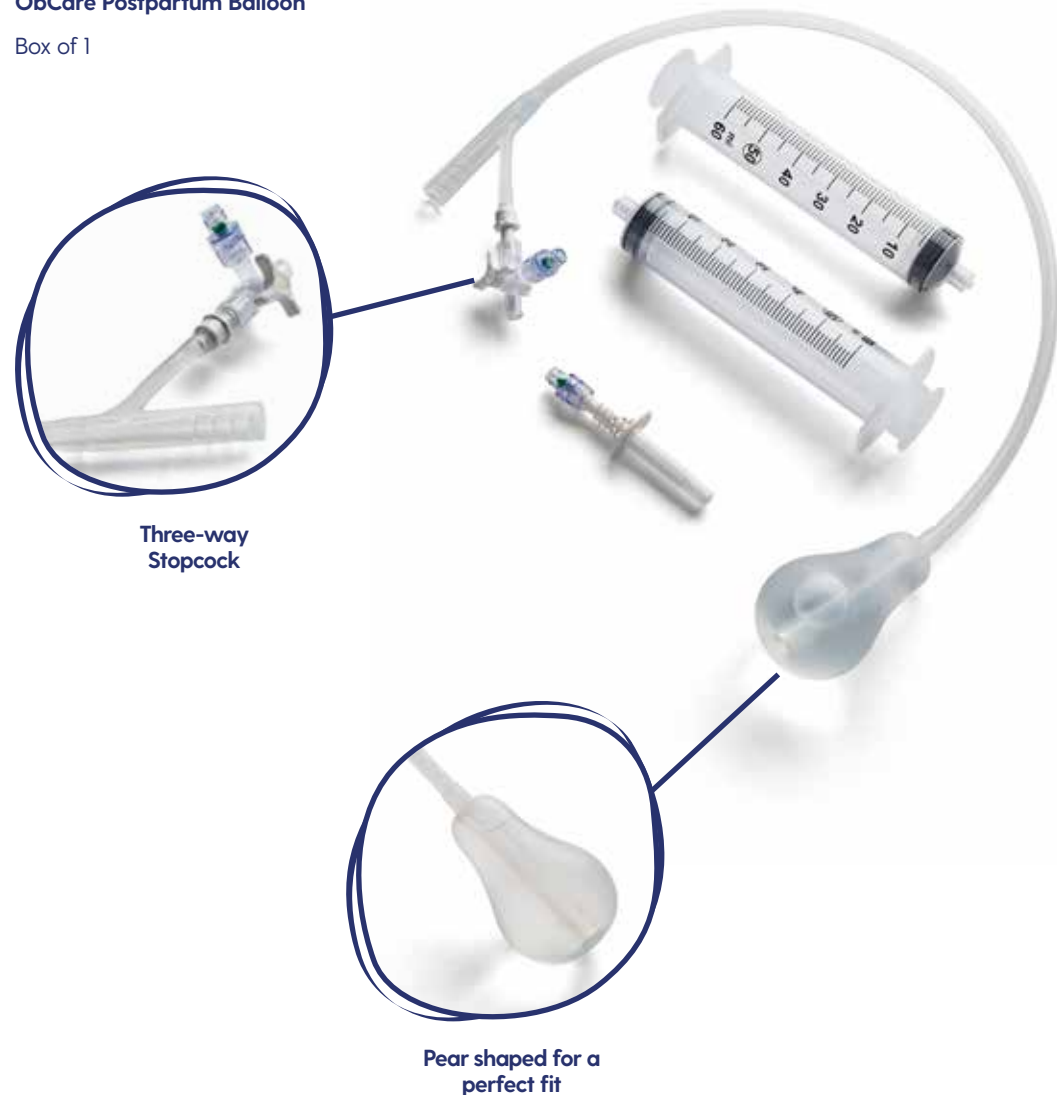

PPB0206

ObCare Postpartum Balloon

Box of 1

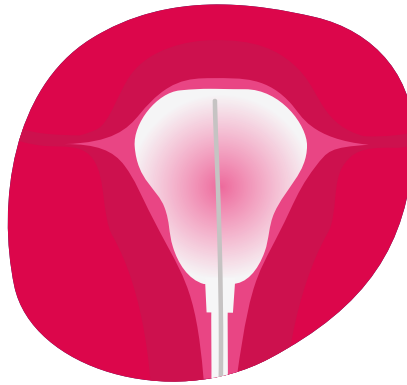

Features

- 1 The systems come complete with:**
 - Bag spike with check valve
 - Dual lumen catheter
 - Two syringes
- 2 Made from 100% medical grade silicone**
- 3 Durable design**
Can hold up to 4ltrs of saline solution
- 4 No protrusion at the distil end**
- 5 Safe & Reliable Supply**

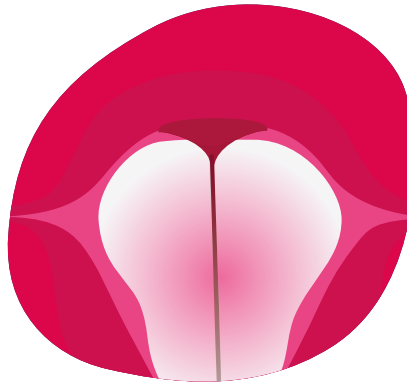

Pear-Shaped Form

The ObCare Postpartum Balloon has a unique pear-shaped form designed to fit the uterine anatomy perfectly and providing the patient with a secure and ergonomic fit.

Reduced Risk Of Harm

Unlike other systems, the blood drainage channel is positioned inwards, allowing the passage of blood to flow more effectively and, with no protrusion at the distal end, the risk of further harm to the uterus is significantly reduced.

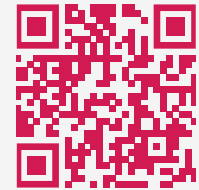

Safe & Reliable

The ObCare Postpartum Balloon System by Toffeln UK is available to dispatch within 24 hours of ordering, enabling you to confidently manage the risk of postpartum haemorrhage safely, efficiently, and reliably.

Instrument Cassettes

Introducing the latest addition to our surgical range: SteriLockBox, instrument protection cassettes by Toffeln. Designed specifically for healthcare, this exciting new range offers a cost-effective solution that minimises the risk of damage to delicate surgical instruments, ensuring a safe and secure environment for storage, transportation and decontamination by Sterile Services.

Our instrument cassettes come in a range of sizes, specifically designed to cater to the unique needs of your department. You can browse our complete range of sizes and options in this section or on our website. As always, if you have any questions or require further information, please don't hesitate to contact our dedicated customer care team or your assigned key account manager.

“Ask about our bespoke customisation service.”

Ryan Storey
Key Account Manager

Benefits

- Robust protection during transportation of delicate instruments
- No need to remove instruments during decontamination process
- Teflon coated silicone reduces adhesion to allow for optimal cleaning
- Easily customised to individual instruments or sets
- Reduction in repair and replacement costs
- Inexpensive and long lasting
- Barcode panel to allow for quick identification.
- Wide range of sizes

Features

- 1 305 surgical grade stainless steel
- 2 Electro-Plated and Polished
- 3 No sharp edges
- 4 Teflon coated silicone to aid washing
- 5 V-Design strip corrects tension

toffeln[®] SteriLockBox

New

IPC185134 Dect

Size 180 x 134 x 25mm

Available with standard cuts to hold 10 instruments, or uncut for optimal customization.

Disposable Gowns & Clothing

Why Toffeln Gowns?

Put simply, you can trust Toffeln because we carefully control not only the manufacture of the gowns but also the production of our technical fabrics. The seams of our garments are ultrasonically welded for the highest levels of seam integrity. All processes follow the requirements of ISO 13485:2016 and our sterile products are packed by our manufacturing partner in a state of the art facility, class 100,000 cleanroom environment. Each Gown is latex free and exceeds the standards of EN13795. We carry stock of our gowns in our Bristol warehouse for fast despatch and have a large production capacity to fulfil NHS and Private Healthcare contracts.

“Thanks to our extensive stock-holding facility located in Bristol and our strong collaborative relationship with our manufacturing facility, we can promise a reliable source of high quality surgical gowns to the NHS and UK Healthcare.”

Oliver Turner Key Account Manager

Material Guide

EcoTex

Manufactured from a mix of 100% Recycled SS spunbonded and SMS spunbonded melt-blown fabric. It is soft and comfortable to wear and is embossed with a texture to provide no-see through modesty properties. It is a favourite for patient gowns, scrubs and warming jackets.

SoftTex

Non-woven Spunlace fabric using pulp and polyester fibres. Spunlace is popular for its softness and cotton-like feel. It has fluid repellent qualities.

LiquidTex

This is a four-layer SMMS fabric made of an inner and outer layer of spunbonded non-woven fabric, sandwiched between this are two layers of melt-blown non-woven. This fabric provides an excellent bacterial and fluid repellent barrier, whilst being cool and breathable to wear.

BarrierTex

SMMS with PE coating this is the Ultimate protection. The coating is impervious but allows a degree of breathability where the highest levels of fluid protection are required.

EN13795-1: 2019

This is the harmonised performance standard for single-use and reusable surgical gowns, intended to minimise the transmission of infective agents between patients and clinical staff during medical procedures. The standard specifies mutually agreed test methods including resistance of the fabric to both wet and dry microbial penetration, wet and dry bursting and tensile strength, liquid penetration, linting and microbial cleanliness. All Toffeln Surgical Gowns meet or exceed EN13795.

OEKO-TEX

Our gowns are made from textiles that have been tested for harmful substances, from yarns to the finished product.

NHS Supply Chain

Our strong working relationship with the NHS means that many of our surgical gowns and clothing are available direct from NHS Supply Chain. Look out for this symbol and NPC code.

Boxes of 50

Features:

- Type IIR EN14683:2019
- Bacterial Filtration > 98%
- Triple layer spunbonded filtration

FV001
Premium Comfort Face Shield

Boxes of 100

Features:

- ISO: 13485:2016
- Ergonomic foam headband
- Can be used with eyeglasses and masks
- Elastic headband for stability
- Double sided protective film to protect from scratches

Toffeln[®] FlexiSpecs

FSF0050

FlexiSpecs Premium Eye Shield Frame

Boxes of 50
Assorted Colours

Features:

- ISO: 13485:2016
- Antibacterial and anti-fog
- Ergonomic patented S-Flex Frame design for increased comfort and flexibility.
- Double-side protective film with easy peel tabs
- Can be fitted over prescription eyewear and surgical masks

FSL0100

FlexiSpecs Premium Eye Shield Lens

Boxes of 100

Features:

- Easy to replace, super clear lens
- Anti-fog

ESA0050

EyeSafe Adult Eye Safety Tabs

ESC0050

EyeSafe Child Eye Safety Tabs

Boxes of 50

Features:

- Protects the eyes during anaesthesia
- Easy peel does not harm skin, eyebrows, or eyelashes, when removing post operation
- Eyes do not dry out even in long operations
- Medical grade material, suitable for sensitive skin
- Reduces risk of corneal abrasion

Advantage for Patients

- Does not hurt the skin, eyebrows and eyelashes while removing (post operation)
- Protects eyes from external splashes during the operation
- Eyes do not dry out even during long operations
- Medical grade material avoids any skin irritation (even on sensitive skin)
- Reduces corneal abrasion risk

Advantages for Healthcare Professionals

- The transparent structure makes for easy pupil dilation control and is visible at any time without removing the EyeSafe tab
- The coloured, non-sticky handle allows for easy and fast application and removal. This reduces the operational risk and saves on application time

Theatre Safety

Specialists in theatre safety, Toffeln tackles the most common risk in hospitals. Everyday thousands of medical staff rely on TripStop to reduce the risk of falling over leads and cables, use our SharpSecure system to avoid injury from sharps, or our SpillStop absorbent sheets to effortlessly soak up fluids.

Toffeln
SharpSecure

Needle and blade disposal system

Toffeln SharpSecure needle counters provide the safest and easiest way of disposing of needles and blades during procedures and includes features such as a blade remover and magnetic and foam areas. Across the UK, hospitals and operating theatres are fast becoming aware that they need a safer alternative than basic sharps pads. SharpSecure provides a safe and effective solution, whilst providing a decreased risk of injury for staff.

TripStop Toffeln

Trip prevention pipe and cable cover

Slips and trips are the biggest cause of serious injuries to health care workers. This brightly coloured, single use, cable and pipe cover helps to prevent accidents.

Supply Chain Product

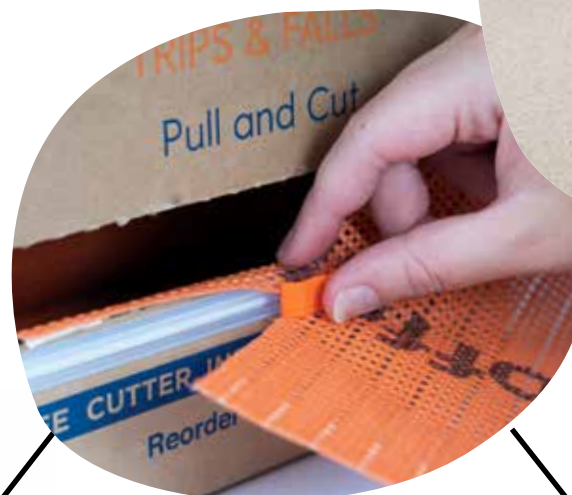

TS40R

TripStop Cable Cover
40m Roll

NHS NPC: VWL308

Features

- Fixes with low tack adhesive on outer edges only
- No sticky residue left behind
- Quality guaranteed Toffeln product
- Quick and easy to use
- Fitted guillotine for easy dispensing

New

TSDISP

TripStop Dispenser

Features

- Pre-drilled holes to attach to a wall if necessary
- Fitted guillotine for easy dispensing

SpillStop^{Toffeln}

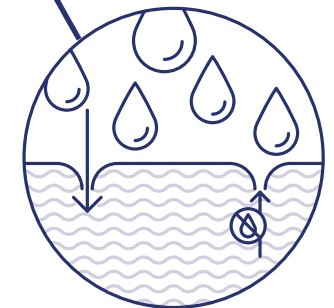

Super Absorbent Medical Matting

Ideal for use around scrub sinks or for operations that involve higher levels of body fluids. Helps to reduce risks of slips related to contaminated floors and cuts down cross contamination.

Features:

- Multi-layer matting with non-slip backing
- Triple-layer structure for high absorbency up to 3.5 litres per metre sq
- Micro-perforated surface, allows ultra-fast absorption
- Sealed back and edges prevents leakage of fluids through the edge or back of the mat protecting the floor
- Available as cut sheets or rolls

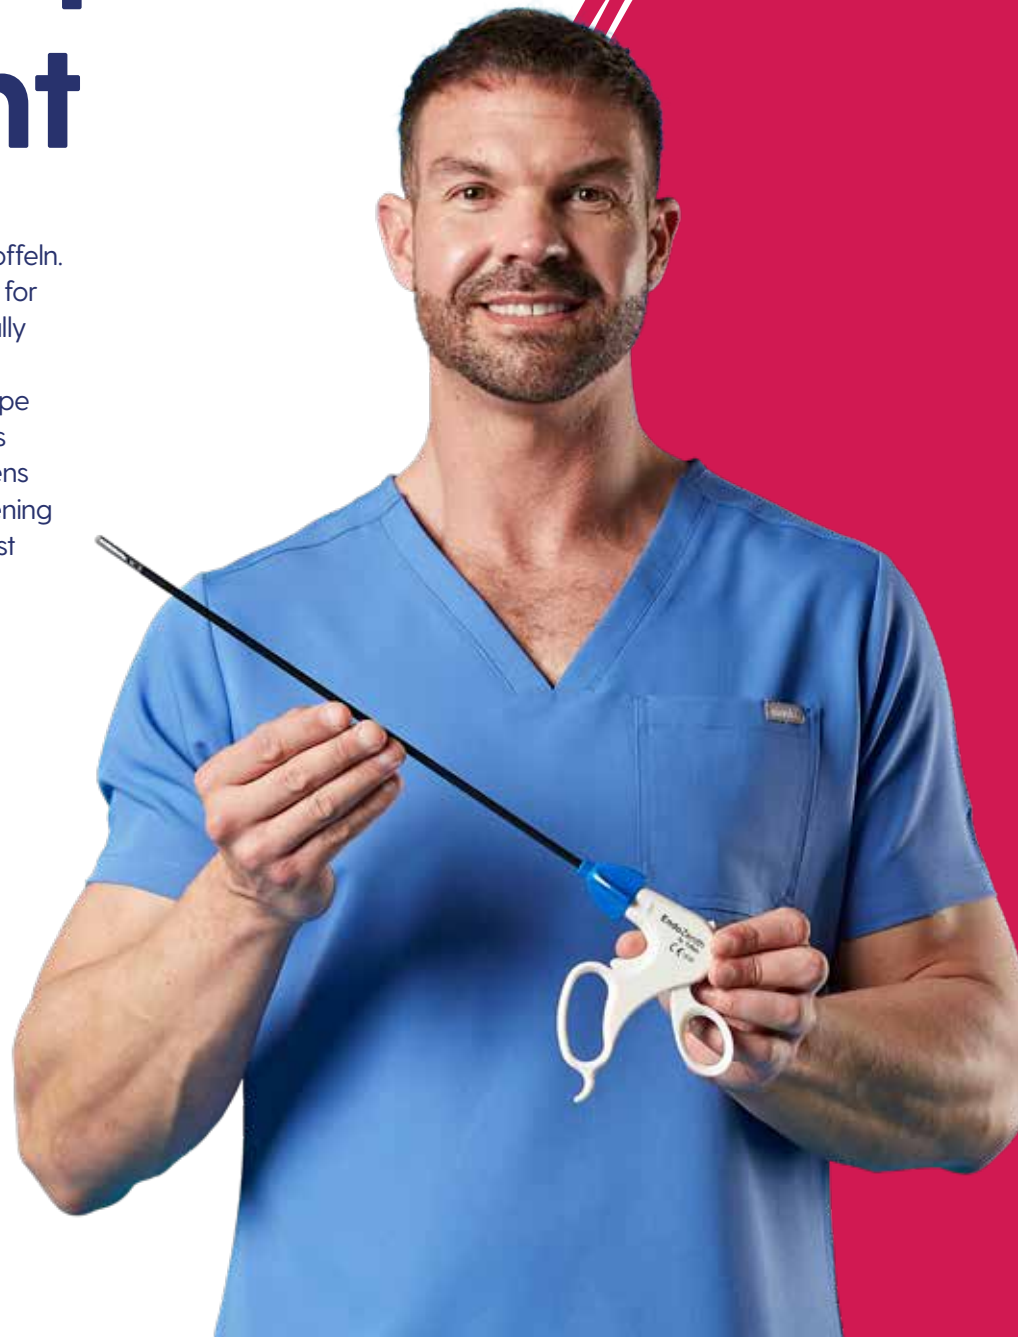

The upper layer is a **micro-perforated sheet** which allows instant liquid penetration and fast dry; holes are reverse-cone-shaped to avoid backflow of fluids to the surface. The central layer is added with **super absorbent polymer (SAP)** capable of retaining large volumes of liquids.

Laparoscopic Equipment

When there is no margin for error you can rely on Toffeln. Our Laparoscopic equipment is trusted by surgeons for its precision and reliability. EndoZenith is ergonomically designed for maximum comfort in use, helping to reduce muscle strain and fatigue. Our ViewMax scope warmer activates in seconds to warm laparoscopes and endoscopes to body temperature, preventing lens condensation. Thanks to its convenient popper fastening no tapes are required, speeding up procedures whilst reducing costs. Trust Toffeln every time.

LA75YHGR-R

EndoZenith Yohanne Grasper with Ratchet

Box of 6

Features:

- Smooth action shaft wheel-fail
- Very easy to use – fingers stay positioned
- Easy action, positive engaging mechanism
- Very ergonomically designed for maximum comfort during use
- Helps reduce muscle strain and fatigue

LA75YHGR

EndoZenith Yohanne Grasper

Box of 6

Features:

- Smooth action shaft wheel-fail
- Safe on/off ratchet mechanism
- Very easy to use – fingers stay positioned
- Easy action, positive engaging mechanism
- Very ergonomically designed for maximum comfort during use
- Helps reduce muscle strain and fatigue

LA75CVSC

EndoZenith Curved Scissors

Box of 6

Features:

- Smooth action shaft wheel-fail
- Safe on/off ratchet mechanism
- Very easy to use – fingers stay positioned
- Easy action, positive engaging mechanism
- Very ergonomically designed for maximum comfort during use
- Helps reduce muscle strain and fatigue

TC65LSWM

ViewMax Sterile Liquid Scope Warmer

Box of 30

Features:

- Activates in seconds to warm laparoscopes and endoscopes to body temperature to prevent fogging
- Simple to use popper fastening

TC65701

Anti Fog Solution

Box of 200

NHS NPC: FBE24632

Features:

- Helps prevent and remove condensation on the distal lens of the laparoscope, for improved visibility in procedures
- Sterile pouch with 6ml easy squeeze bottle and adhesive backed sponge pad
- Non-abrasive sponge, radio opaque

New

TC65SCWM

Electric Scope Warmer

Box of 25

TC65SCWB

Replacement Rechargeable Battery

Qty 1

Features:

- Prevents and removes condensation from the distal lens of the laparoscope, for improved visibility in procedures
- 1x rechargeable battery unit and transformer supplied with your first order
- Ideal for longer procedures
- Adjustable temperature control

Patient Moving & Positioning

We are delighted to unveil our brand-new ErgoTrics range! This new addition to Toffeln's Patient Positioning & Moving Range empowers healthcare professionals to effortlessly position and transfer patients with the power of compressed air. Exclusively available through Toffeln in the UK, this new range ensures the safety and well-being of both patients and healthcare professionals.

In addition to this new range, we continue to offer our trusted patient gel positioners, which provide superior pressure relief to patients, whilst being easy to clean and x-ray translucent.

For more information on any of our Patient Positioning & Moving products, please contact your Toffeln Key Account Manager today.

Product demonstrations & free trials are available on request.

**DISCOVER THE
POWER OF
COMPRESSED AIR**

“Our new ErgoTrics product line will ensure the patient's safety and dramatically reduce the risk of injury to healthcare professionals when manoeuvring patients under anaesthetic.”

Danielle Leflaive
Sales Support

Do you suffer from back pain as a result of moving your patients?

With the use of compressed air instead of manual force, **ErgoTrics** products provide better support for patients without adding ergonomic burden and potential injury to healthcare professionals. This new technology ensures that patients are kept comfortable and correctly positioned during medical procedures and improves the quality of care provided.

Features

- Optimal patient positioning capabilities
- The use of compressed air means less chance of injury for the patient and the healthcare professional.
- Fully x-ray radiolucent
- Reusable depending on the infection risk

Scan me to
see ErgoTrics
in action.

Optimal Positioning

The ErgoTrics cushions are designed as a mirror image of the human skeleton. In this way, they support the ribcage and pelvis, while leaving the abdomen free from pressure.

Better Ergonomics

Using compressed air instead of manual labour is an ergonomic breakthrough for hospital staff. 90% of existing users say that "minimal to no force is required to position patients into prone position".

X-Ray Transmission

The ErgoTrics solutions are fully X-ray radiolucent, which facilitates X-ray applications.

Optimal Hygiene

COVID-19 has heightened the world's awareness of attention to hygiene. ErgoTrics offers disposable, single patient use and reusable inflatable solutions depending on the infection risk.

“At Toffeln, we are committed to providing innovative products that improve the well-being of healthcare staff and their patients. With the addition of ErgoTrics, we are confident that we can better serve the medical industry, improve patient outcomes and reduce the risk of injury to healthcare professionals.”

Harry Turner
Sales Director at Toffeln

Inflate using
Hummingbird
Air Pistol
(see page 103)

PP-IBO

ErgoTrics Inflatable Board IBO

Box of 1

The IBO is reusable for 250 applications and is provided with a pressure sensor. The sensor counts automatically how often the IBO has been used and displays the usages with the LED lights. A handy feature to ensure safe use, also in case of regular shift changes.

Turning patients from supine to prone position remains a difficult task, both technically and ergonomically, especially with patients weighting over 80kg (175lb). A patient under general anaesthesia should not be tilted by one person alone. The Inflatable Board (IBO) is the ideal device for the safe and controlled tilting of patients.

Features:

- Makes process of proning (tilting) easier and faster
- Better ergonomics for healthcare workers by using compressed air
- Controlled and safe for patient (without torsion and specific pressure points)
- Tilting with less people.

PP-IXSR / PP-IXSRT (with tape)

**ErgoTrics Inflatable Support
IXS Rectangular Cushion**

Shape: Rectangle **Sizes:** L, XL **Qty:** 5

PP-IXSS / PP-IXSST (with tape)

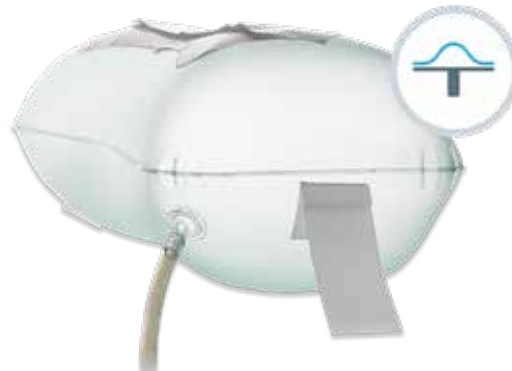

**ErgoTrics Inflatable Support
IXS Sickle Cushion**

Shape: Sickle **Sizes:** L, XL **Qty:** 5

Used to provides optimal access to the surgical or medical procedure site while maintaining body function and structural integrity.

Features:

- Adjustable (inflate/deflate)
- 100% hygienic
- X-ray permeable
- Different shapes and sizes available

PP-IPS

ErgoTrics Inflatable Prone Support (IPS)

Size: L (up to 150kg) / XL (up to 180kg)

Box of 5

Used to avoid venous congestion and pressure on nerves, by mirroring the human skeleton and variations in size, the IPS supports the rib cage and pelvis whilst allowing the soft tissue and abdomen to hang freely. This reduces the risk of bedsores, Intra-Abdominal Pressure (IAP) and prevents venous congestion. The IPS also reduces the risk of injury to healthcare professionals.

Benefits:

- Safer positioning on air
- Good hygiene
- Better Ergonomics
- Supports patient weight of up to 180kg

PP-OPEROLL

ErgoTrics Operoll

Size: L (up to 150kg) / XL (up to 180kg)

Box of 2

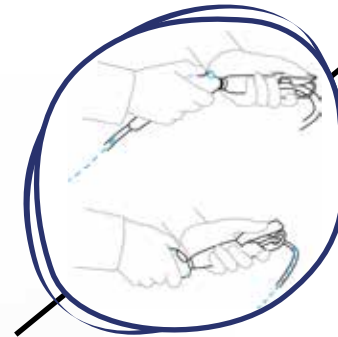

Used to provides optimal access to the surgical or medical procedure site while maintaining body function and structural integrity. The Operoll is placed under the patient on the operating table (or any other supporting surface). When the patient needs (re)positioning, the Operoll is partially or fully inflated using compressed air and will lift the patient into the desired position.

Benefits:

- Adjustable (inflate/deflate)
- Better ergonomics for healthcare professional by using compressed air
- 100% hygienic
- X-ray permeable

**“Better support
for patients
without the
ergonomic
burden on
healthcare
professionals”**

**The Hummingbird is
compatible with all
ErgoTrics products**

PP-HUMMAP

ErgoTrics Hummingbird

Box of 1

A specially designed reusable air pistol for applications in the medical world. Ensures the safe use of medical compressed air in the hospital. The capacity of 4-6 bar can safely be used in a dosed manner to inflate the positioning devices from the **ErgoTrics** range.

Features:

- Compatible with all **ErgoTrics** devices
- Safe and easy to use
- Used to inflate and deflate the **ErgoTrics** positioning cushions and to adjust the pressure

GelPositioners[™]

Features

- Superior pressure relief
- Help prevent decubitus ulcers and nerve injury
- Ideal for sensitive skin
- Easy to clean
- High strength and elasticity
- Reusable
- Can be warmed or cooled
- Will not harden over time
- X Ray translucent
- Anti-bactericidal
